Microsoft failure is odd comparing to its 1999-05 &10. On a scale of 10, this is a 2, happened after Apple iPhone and iOS's flying High. Microsoft workers must have had bad 2013 Holidays. In our opinion, blaming Steve Ballmer will not cure its problems. Its programmers were lazy to fix software bugs, by removing good features off its products and rearranged icons to confuse consumers when they should have improved their mobile devices. It's a double negative performance chart says!

Did APPLE Computer eat up Microsoft Lunches?

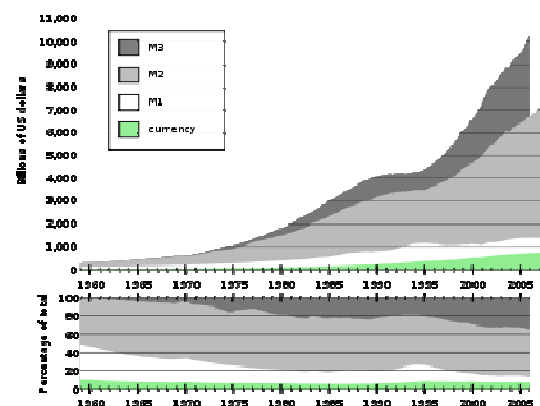

//SupernaturalEngineering.com where realities and predictions meet.

In 2013-14 yes it did as shown in Apple emotional and business health below; however **Don't** buy more Apple shares or short Microsoft stocks without doing your home work, or consulting with us first.

Why many Financial Analysts were wrong and will continue to be wrong again?

Because they are human making mistake like every one, their formula and reality aren't matching.

BTW - You cannot see the depth of human psyche, their success and turmoil through 10-common astrology tools!! Only through us & Superview! The human psyche does change over time, to positive or negative, depending on individual TIME FORCE. Supernatural Engineering is a Trend Analysis Company, specialized in predicting world wide war, tension, conflict, financial rise and fall, health or personal issues of rich individuals wanting to protect their assets. Don't be unwise like Steve Jobs on health issues, and a few others (we won't name them).

Has APPLE success anything to do with Steve Jobs?

The answer is Yes partially but the main success of Apple came from the fall and rise on its own TIME FORCE.

The same answer goes to Mr. Warren Buffett as well. Remember: Nothing is permanent!

A lot of Rich guys hypnotize themselves to believe that their success came from them rather from TIME FORCE or gift arranged by God before they came to earth. Just because you are rich, it doesn't mean you don't have other problems.

This is Apple's successful moment. How long will it stay? Chart at nominal fee is available!

On a scale of 10, this is a 9. Apple's successful has been one of a kind. Its success is a result of its iPhone, iOS products etc. See Apple's popularity in division #7, lots of planets (people) liking its products. Warning investors: what you see is just a peak of a quarter, it doesn't mean it'll stay at this level forever. Microsoft realized its mistakes at the same time.
