U.S.A	Secrecy, strong self-image, neglected own people, strong will people	72%	Techno-science, negative law & regulation, population controls.	28%

What is WILL POWER?

"Will-power" is what people see **important** in their live. Will-Power stays with every one forever until the end of life or Revolution. Will-power works like a soul, it hardly changed. It accumulates desire like a Vulcan. Unlike the Interest-In-Life that can change over time. These two qualities can be afflicted; when afflicted, the native would fight until death or death can take them away depending on circumstances, see * mark on unfortunate people.

Beware of this vague term "**Security**". It does **not** mean safety for you general public but mainly for the Government. Sometimes, it can mean "**Monetary Security**" for the wealthy / elites in war time. For example, Security in

Syria for the West's wealthy or RUSSIA. They meant they fight about moneys, commodities and natural resources of the middle east. TERRORS/ISIS is the name of the game to intrude on RUSSIAN-SYRIAN trade relationship. RUSSIA allies don't mind playing such a game. There are fake ISIS and real ISIS. The ISIS game is getting out of hand; now your government wants more NSA and the redesign/modification of your iPhone Security to sneak behind your privacy, at your expenses. If Apple lost the legal battle, you'll pay the costs. Further more the modification of iPhone will make cell-phones vulnerable to hackers, you will lose your financial information after your online purchase. The Gov surveillance won't solve ISIS issue. Currently smart phone security is difficult for hackers to bypass, it was done at GSM hardware level. Lawyers are Politicians and Judges, they understand force only **not** science or technologies.

This is a real-time chart of the U.S.A as of February 17, 2016. This presentation is to show you that we do not make thing up. We translate the meaning out of Superview, the gift of knowledge God Jehovah given to us.

The WILL Power of the U.S.A. is located in division #12 (Secrecy) and division #1 (Self-image) . Together with other little planets in division #1 promoting her self-image expansively. This means she loves to communicate and to maintain her appearance to be more important.

This combination can be good and bad, mostly bad because what if she doesn't have what she claims she has? Wouldn't that be deceitful? The good is, she can allure her victims to buy her products quickly and promise to take care of customers later, whether she will follow up with her promise that is another issue. Today the main problems in America are not only about fraudulent banking against consumers; there are insurers failing to take good care of customers when it comes to paying claim. The insurers had lobbied your politicians to (corruptively) create law for them to abuse the public to avoid paying claims, to increase their Stock Value for investors. Typically in every \$100 of premium collected, they paid out \$2 to your claim. This is not our word, this is evidenced by the insurers' advertisement. The insurers can accuse the insured for committing insurance fraud using their twisted view through excessive unregulated EUO. Current law allows the insurers' lawyers to be the judge of your case. If you're busy with other legal obligation, and couldn't come to their EUO, they can deny claim or make you a double victim through their accusation of insurance fraud thru intimidation and twisted view after your legitimate claim. If you've been injured, the insurers can accuse your unemployment as the cause of your claim. The problems went on and on for corporations to get rich so quickly.

The division #8 indicates "the Exercising of Power" by Negative Authority (Saturn). She misbehaved badly for a long time using force and poor judgment on her people and foreign lands.

Her excessive/abusive authorities were accumulated over time, finally they tipped over her morality in 1967 and thereafter; illustrated by the negative Saturn, evidenced by the bombing of Laos, Vietnam, Cambodia, and more.

How do you fix her bad authority when she's badly drunken and couldn't get better? She doesn't get along with her children and the world community. These are illustrated by her division #7, see negative Mars & Neptune there. They foretell us that she had strong enemies from July 1928 forward, illustrated by her conflicts in the middle East and with the BRICK nations. After 16-years of horrible experience, the children asking themselves "what is the solution?" The solutions are within themselves. The reset buttons must be pushed synchronously, all children must fight against the family disease physically, there is no other way.

Division #3 indicates her super-intelligence/multi-brain. She is one of the world's smartest country.

When did she get smart? September 1969 after her brain got Bigger. She landed her Apollo-11 on the moon, to show off /deter her enemies. Prior to this period, her technologies were done in an old fashion way (using large slow electron-tubes computers, slow pace economy, etc.). Back then she was not 1/4 smart of her 2016 intelligence. Her super-intelligence doesn't govern her entire body, due to her multihead busy doing other things. The smarter she gets the more problems she has... She forget the fact that this world is still controlled by God Jehovah, the living Creator. Who is God Jehovah? Look up your bibles.
